Wattle Range Council

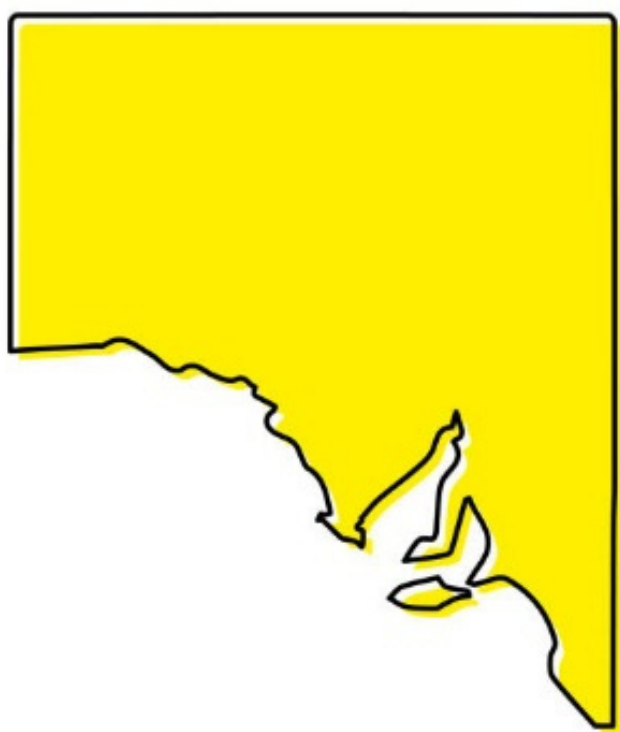

Disability Access and Inclusion Plan 2025- 2029

Easy English

We are the Wattle
Range Council.

We are on the Limestone
Coast in South Australia.

Wattle Range Council
has 13 communities
and 12,319 people.

The Boandik and Pinechunga people are the Aboriginal people of the region.

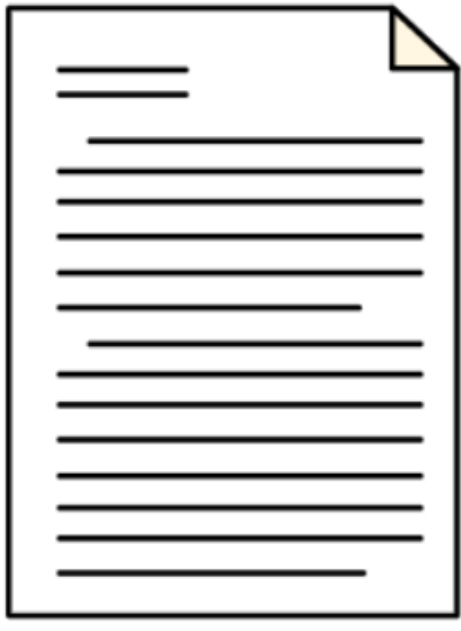

Wattle Range Council is a great place to live and work.

We want the community to include everyone.

We are making a plan to help us do that.

It is called the Disability Access and Inclusion Plan 2025-2029. This plan will

- make services in the community better

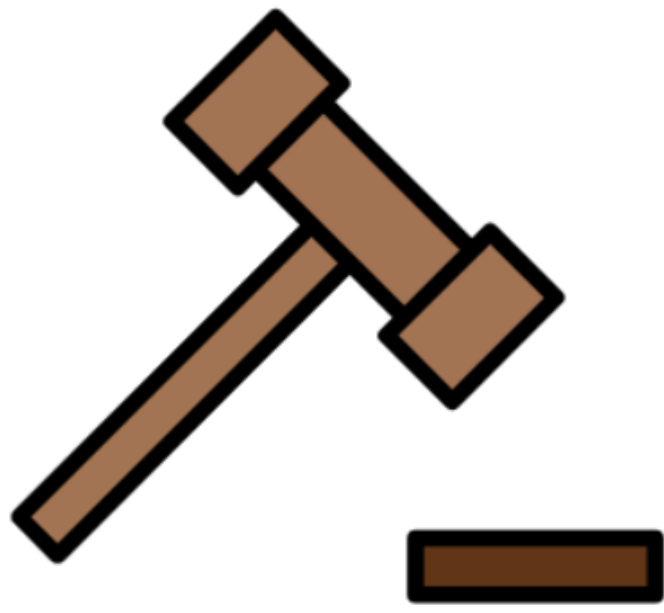

- make the environment better

- help people in the community have good places to live

- help people in the community have good places to work.

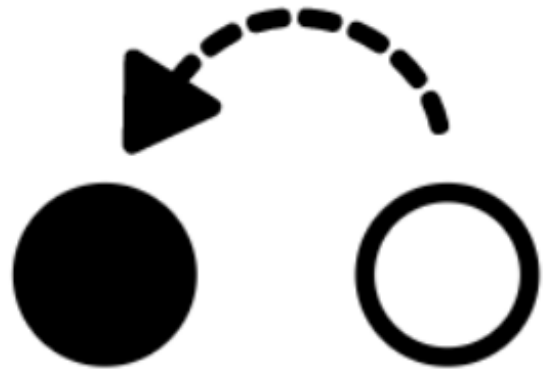

This plan follows South Australian laws.

8 people with disability helped to make the plan.

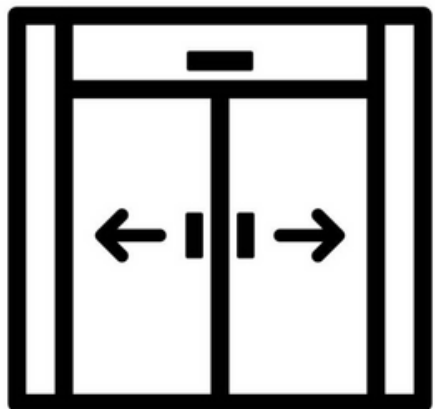

We got feedback from the community about the plan. This helped us make it better.

We had a plan before this one. It was called the Disability Access and Inclusion Plan 2019-2023.

This plan helped to

- put more automatic doors on community buildings

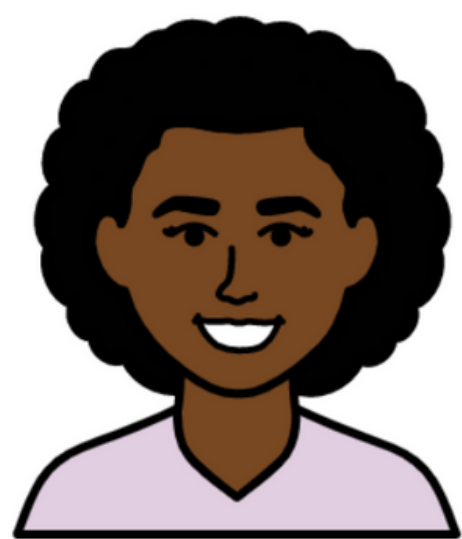

- make events easier to access

- check carpark to make sure they were good for people with disability

- make the library easier to access.

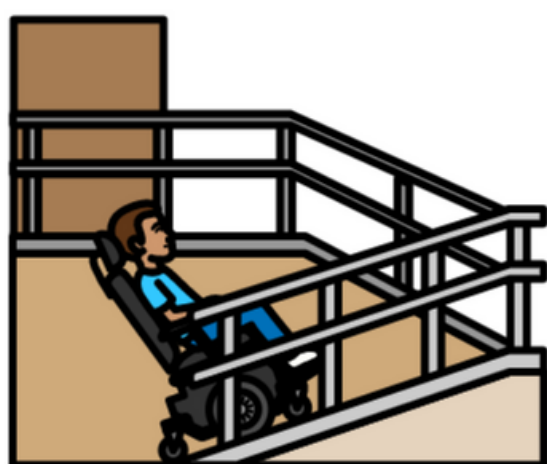

The Disability Access and Inclusion Plan 2025-2029 will also help us do good things.

The plan will show respect for people with disability by

- giving training to the community

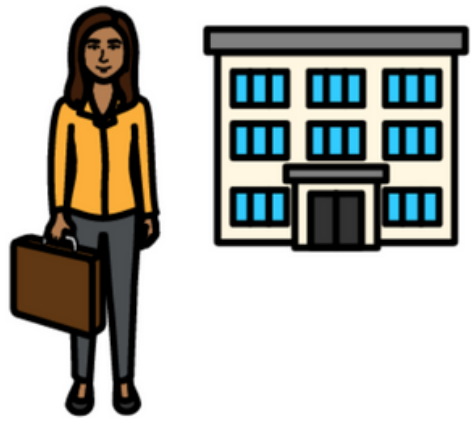

- checking council buildings to make sure everyone has access

- making our relationship with the disability community stronger

- making our relationship with First Nations people stronger.

**The plan will make education
and work better for people with
disability by**

- training council workers

- giving people with disability
more opportunities

- improving how we collect
information.

The plan will help support people with disability by

- making the council's "welcome packs" better for people with disability

- making sure programs and other supports include people with disability.

**The plan will help keep
people with disability safe by**

- Checking plans to make
sure they are good for
people with disability. This
includes plans like leaving a
building if there was a fire.
